CHRISTIAN KAIKAI

Full Stack Software Developer

+1(905)-347-1237   ckaikai19@gmail.com

ABOUT

I am a full-stack web developer with a solid ability to design, build and maintain high-quality code from conception to production within a individual and team setting. I pride myself on having a strong focus and attention to detail no matter the complexity of a project. I'm extremely curious and a quick learner of new technologies and always stay up to date with modern-day JavaScript frameworks and libraries.

SOFTWARE ENGINEERING SKILLS

HTML & CSS & Javascript	Node.js & Express.js
React & React Native	MongoDB
RESTful APIs & GraphQL	Git & Github
SQL & MySQL	Unit Testing

TECHNICAL PROJECTS

OddJobs
https://project3-oddjobs.herokuapp.com

- The front-end developer in a team of 4 to build a full stack MERN stack application where users can post, read, search, and apply for small non-contact jobs
- Utilized React to create the front and route pages to render each component
- Made query calls using Apollo GraphQL to perform required CRUD operations on the Mongo Database
- Tech stack: **React, JavaScript, Node.JS, Express.JS, MongoDB, Apollo GraphQL, JSON Web Tokens, Bcrypt, Heroku**
- GitHub Repository: github.com/JoelCronin/OddJobs/

Movie App
https://joelcronin.github.io/effective-computing-machine/index.html

- Collaborated with a team of 3 developers to build a front-end application that utilizes 3rd party movie APIs
- Tasked with designing a wire frame on Figma, Gathering data from API's using fetch requests and styling all pages with pure CSS while handling Git merge conflicts
- Tech stack: **HTML, CSS, JavaScript, Fetch API, Moment.js, Github Pages**
- GitHub Repository: https://github.com/JoelCronin/effective-computing-machine

Social Media App

- Built a full-stack React Native image-sharing social media from design to production
- Took advantage of AWS S3 Buckets to store images to later display them on the front end
- The app allows users to log into their accounts, upload images from their gallery, view them on the main feed and comment on existing posts while offering a clean UI.
- Tech stack: **React Native, Expo, Bootstrap, Node.JS, Express.JS, mySQL, AWS S3**
- GitHub Repository: https://github.com/ckaikai19/Image-Sharing-Client

Empolyee Managment System
https://leafy-mooncake-04fcc2.netlify.app/

- A full-stack application built with the purpose to help managers keep track of their employee's data
- Designed on Figma and later built on React, this app offers a clean UI interface where managers can perform all CRUD operations and view the paid status of each employee
- Tech stack: **React, Node.JS, Express.JS, mySQL**
- GitHub Repository: https://github.com/ckaikai19/reimagined-robot

EDUCATION

♣ University of Toronto - Coding Bootcamp · 2022

An intense 12-week long coding Bootcamp focused on gaining technical programming skills in various aspects of full-stack web development such as HTML5, CSS3, Javascript ES6, JQuery, Bootstrap, Node.js, MySQL, MongoDB, Express.js, Handlebars.js, React.js, and more.

♣ University of Victoria - Bachelors of Social Science · 2019 — 2022

Relevant courses taken include:

- CSC 115 - World Wide Web and Mobile Applications
- CSC 223 - Data Stuctures and Algorithms I
- CSC 110 - Fundamentals of Programming I
- CSC 230 - Introduction to Computer Architecture
